RESOLVED:

1. The Committee considered that the provision of 123 units of affordable housing on site and a commuted sum of £78 million towards the City Council's affordable housing fund is sufficient to meet the City Council's expectation for the affordable housing requirement generated by this site.
2. Subject to 1 above and referral to the Mayor of London, that conditional permission be granted subject to the additional conditions tabled, the deletion of permitted development rights, the removal of Condition 38 and a S106 legal agreement to secure:
 - provision of affordable housing and a financial contribution of £78 million towards the affordable housing fund; with a memorandum of understanding to prescribe the spending parameters and accountability protocol of the affordable housing fund in which the monies will be held. £39m shall be paid to the Council prior to the commencement of any work with the remaining £39m being paid five years after the date of the first payment or upon commencement of phase 2 whichever is the sooner.
 - a bond from a UK clearing bank to secure the second half of the £78m financial contribution

- provision of employment, training and local procurement opportunities in respect of both the construction and the employment generating uses thereafter;
- provision of a financial contribution towards the establishment of an air quality monitoring station on or near the site;
- an advertisement and shopfront strategy.
- to achieve a Code for Sustainable Homes level 5 rating (or equivalent) in respect of all residential units unless persuasive evidence is provided prior to the commencement of each phase that one or more elements of the development are only capable of achieving level 4. In such instances the applicant will be required to demonstrate at each phase that he has made all reasonable endeavours to achieve level 5; anything less than level 4 will not be acceptable. The Council may require an independent assessment of any such case at the developer's expense.
- a feasibility report submitted for the Council's review regarding the practicality of the installation and use of ground source heat pumps in order to reduce or remove the roof top plant if it is proven to be practicable to do so which the applicant will then implement; this report will be subject to an independent assessment at the developer's expense and will be made available to the public.
